3-LAYER SYSTEM

OUTER LAYER

This layer prevents wind and water from reaching internal layers. All materials are waterproof, windproof and, thanks to a technically advanced membrane, even extremely breathable. Taped seams and laminated zips totally assure protection from the elements.

Questo strato non deve permettere al vento e all'acqua di entrare a contatto con gli strati interni e quindi con il corpo. I materiali sono waterproof, windstopper e, grazie alle membrane tecniche, sono anche altamente traspiranti. L'utilizzo di cuciture termoastrate e zip laminate contribuisce a rendere il capo totalmente waterproof.

MID LAYER

This layer must keep the body warm without excessive heating while allowing complete freedom of movement.

This layer is independent and its thickness can vary according to outside temperatures. Body moisture is wicked away from the body to evaporate on the fabric's surface.

È lo strato che deve impedire al corpo di raffreddarsi o di riscaldarsi eccessivamente; nel contempo deve lasciare massima libertà di movimento.

Questo strato è componibile: il suo spessore può variare in funzione della temperatura esterna.

BASE LAYER

This layer is in direct contact with the skin, therefore it must offer a high degree of comfort. It needs to be light, flexible and breathable. It also needs to offer an optimal physiological equilibrium by preventing the proliferation of bacteria, skin rashes and dermatitis.

È lo strato direttamente a contatto con la pelle e pertanto deve offrire elevate prestazioni di comfort, leggerezza e traspirabilità. Deve garantire inoltre un'ottimale equilibrio fisiologico, impedire la proliferazione dei batteri e la formazione di allergie e dermatiti.

The Skipper

Franck Cammas

Franck Cammas, a French sailor and professional racer with a series of outstanding achievements, has worked with SLAM since 2007. Franck received the "Sports Academy Grand Prix" in 2010, an award that has been given to champions like Eric Tabarly, Roger Federer, Usain Bolt and Michael Schumacher. Franck Cammas, winner of the 2010 "Route du Rhum", also beat the "around the world sailing with crew" record, the Jules Verne Trophy, without touching land or assistance and all done in SLAM clothing. In 2011 he has a new challenge alongside SLAM: the Volvo Ocean Race.

"SLAM and I have had a fruitful and productive relationship. After every sea outing the crew of Groupama and I brainstorm with SLAM, allowing the brand to improve the performance of its products. The ocean is not forgiving and the certainty of having the appropriate clothing for the most extreme situations allows me to focus exclusively on the evolution of Groupama 4 and goals to reach: new victories to be won."

Franck Cammas, che collabora con SLAM dal 2007, è un velista d'altura francese e anche un professionista del settore regate che ha conosciuto una serie di successi eccezionali. Nel 2010 ha ricevuto il «Gran Premio dell'Accademia Sportiva», un riconoscimento già conferito a campioni del livello di Eric Tabarly, Roger Federer, Usain Bolt e Michael Schumacher. Franck Cammas, vincitore della Route du Rhum 2010, ha altresì battuto il record del giro del mondo a vela con equipaggio senza scali né assistenza, il Trofeo Jules Verne, dotato di abbigliamento SLAM. Nel 2011 lo attende una nuova sfida a fianco di SLAM: la Volvo Ocean Race.

"Tra SLAM e me è nata una collaborazione proficua e fruttuosa; dopo ogni uscita in mare, i membri dell'equipaggio di Groupama ed io ci confrontiamo con SLAM, consentendo così al marchio di migliorare le prestazioni dei suoi prodotti. L'oceano non perdona e la certezza di avere l'abbigliamento adatto alle situazioni più estreme mi permette di concentrarmi esclusivamente sull'evoluzione di Groupama 4 e sugli obiettivi da raggiungere: nuove vittorie da conquistare."

9 MONTHS AROUND THE GLOBE 39.270 NAUTICAL MILES

The Volvo Ocean Race is an exceptional test of sailing prowess and human endeavour which has been built on the spirit of great seafarers - fearless men who sailed the world's oceans aboard square rigged clipper ships more than a century ago. Their challenge back then was not a race as such, but recording the fastest time between ports.

It became a reality in 1973 with The Whitbread round the World Race, the longest, most demanding and perilous sporting contest the world had known.

The re-badged Volvo Ocean Race was run for the first time in 2001-2002. Today it is, quite simply, the 'Everest of Sailing'. During the nine months of the Volvo Ocean Race, which starts in Alicante, Spain in October 2011 and concludes in Galway, Ireland, during early July 2012, the teams will sail over 39,000 nautical miles of the world's most treacherous seas via Cape Town, Abu Dhabi, Sanya, Auckland, around Cape Horn to Itajai, Miami, Lisbon, and Lorient. The race requires to the sailors their utmost skills, physical endurance and competitive spirit as they race day and night for more than 20 days at a time on some of the legs. The race is the ultimate mix of world class sporting competition and on the edge adventure, a unique blend of onshore glamour with offshore drama and endurance.

La Volvo Ocean Race è un eccezionale test di prodezza dell'andare per mare e della resistenza fisica che è stato costruito sullo spirito dei grandi e coraggiosi navigatori che avevano solcato i mari di tutti gli oceani a bordo dei meravigliosi clipper più di un secolo fa.

La loro sfida allora era quella di stabilire record di velocità tra un porto e l'altro. Nel 1973 fu corsa la prima "Whitbread Round the World Race", la competizione sportiva più lunga, audace e pericolosa che non fosse mai stata organizzata.

Nel 2001-2002 fu poi rinominata Volvo Ocean Race. Oggi è semplicemente considerata "l'Everest della Vela".

Durante i 9 mesi della Volvo Ocean race, che partirà ad Ottobre 2011 da Alicante, in Spagna e si concluderà a Galway, in Irlanda all'inizio del Luglio 2012, i team navigheranno per oltre 39000 miglia nautiche attraversando i mari più pericolosi, passando da Cape Town, Abu Dhabi, Sanya, Auckland, per poi circumnavigare Cape Horn e toccare Itajai, Miami, Lisbon, and Lorient. I velisti devono dimostrare grinta, resistenza e spirito di competizione perché regatano nelle condizioni più estreme, giorno e notte, per oltre 20 giorni consecutivi, tra una tappa e l'altra. Questa regata rappresenta un perfetto mix tra competizione, avventura estrema e glamour delle località ospitanti.

CONTINUOUS CYCLE

RESEARCH & DEVELOPMENT RICERCA E SVILUPPO

Before the design stage, scientific research is carried out on garment manufacturing according to their end use. Ongoing research in new materials, fabrics, construction and shapes means products perform better, are stronger and last longer.

Alla base del progetto c'è uno studio scientifico sull'ingegnerizzazione dei capi in funzione del loro utilizzo. La ricerca di nuovi materiali, tessuti, strutture e forme è una costante che porta al continuo incremento di performance, durata e resistenza dei prodotti.

PRODUCTION PRODUZIONE

Our production process is based on innovation and high quality materials. The focal point of the garment is its composition, style and construction.

L'innovazione e la qualità del materiale sono alla base del nostro processo produttivo. L'assemblaggio, lo stile e la costruzione del capo ne sono il punto focale.

TEST TEST

Athletes from various SLAM Sailing Teams offer constant support to research and development. They give feedback based on their experience and technical know-how so that SLAM can evaluate the products and enhance their performance.

Sono gli atleti dei vari Slam Sailing Team a supportare continuamente il lavoro di ricerca e sviluppo. Grazie alla loro esperienza e conoscenza tecnica, SLAM ha un feedback costante per valutare i prodotti e implementarne le performance.

Anatomic and Ergonomic fit
Wind-resistant and retains body heat
 Spandex Neck Opening for comfort
 Flat stitching with double hold
 360° stretch material
 Internal anti-ride silicon grip on trim

Vestibilità anatomica ed ergonomica
Ripara dal vento e mantiene il calore corporeo
 Giracollo in spandex per maggiore comfort
 Cuciture piatte a doppia tenuta
 Tessuto stretch a 360°
 Grip interno in silicone al fondo

PLUS

The Titanium coating gives you extra thermal insulation making it superior to all other Neoprene rubbers. The Titanium layer reflects your body heat inward.

La fodera interna in Titanium conferisce un grado di calore superiore rispetto a qualsiasi altro capo in Neoprene. Lo strato in Titano non permette al calore corporeo di fuoriuscire riflettendolo all'interno.

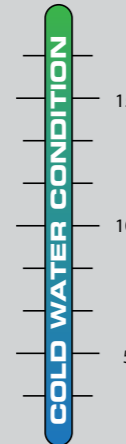

INNER LAYER

Neoprene rubber & Titanium Interno in Neoprene & Titano

Slam Underwear base-layers are designed to be worn next to the skin and are ideal for all sports activities. Their **differentiated structure** is engineered to support muscles without compressing them, **though increasing breathability**. Slam Underwear base-layers are made from **Carbon** and **Dryarn** polypropylene with a blend of active fabrics, in a **balanced combination between comfort and technology**.

Ideali per ogni tipo di attività sportiva i capi della linea underwear si indossano direttamente a contatto con la pelle. Grazie alla loro **struttura differenziata** sostengono la muscolatura senza costringerla, **favorendo la traspirazione**. Realizzati in polipropilene **Dryarn** e **Carbonio**, unitamente ad un mix di filati attivi, rappresentano la **perfetta unione tra Comfort e Tecnica**.

JACKSLACKS

WATERPROOF JACKET

WITH PULL OUT PANTS CONCEALED IN ITS POCKETS

LA GIACCA IMPERMEABILE
CON I PANTALONI ESTRAIBILI DALLE TASCHE

SLAM drew on its experience in regattas to produce Jackslacks, a waterproof jacket with extractable trousers concealed in the pockets. This is a perfect choice for motorcyclists and for outdoor activities; handy for anyone caught in an unexpected downpour.

Dall'esperienza dei campi di regata, nasce la Jackslacks, la giacca impermeabile con i pantaloni estraibili, ideale per motociclisti e per attività "open air", per non farsi cogliere impreparati da un acquazzone improvviso.

EASY & FAST SYSTEM

The waterproof trousers are concealed in the pockets and they can be put on in just a few seconds, even sitting down.

I pantaloni impermeabili si estraggono direttamente dalle tasche interne e si indossano in pochi secondi anche stando seduti.

Wind-resistant and breathable
Dries faster than down
Antivento e traspirante
Asciuga più velocemente della piuma
Water-resistant
Impermeabile
Thermally efficient
Termicamente efficiente

WATER GAIN ASSORBIMENTO D'ACQUA

Primaloft absorbs less water than its competitors, which absorb from 2.9-4.1 times more water.
Primaloft assorbe meno acqua di altri competitor.

Test: Hohenstein Institute Certified. Samples submerged in room temperature distilled water and placed in a centrifuge to remove excess water. Sample size - 12" x 12".

THERMAL PERFORMANCE: DRY VS WET

PERFORMANCE TERMICHE: ASCIUTTO VS BAGNATO

Thermal insulation tests conducted at the Hohenstein Institute Bonnigheim - Germany, have proven gram for gram, PrimaLoft is warmer - wet or dry!

I test di isolamento termico condotti da "Hohenstein Institute Bonnigheim" - in Germania, hanno dimostrato che il PrimaLoft è sempre più caldo: sia asciutto, sia bagnato.

Test: Hohenstein Institute Certified-ISO 11092. Sewing guarded rectangle of "skin model" as described in ISO 11092 was used to determine the heat transfer properties of these insulating materials.

31
23
15
07
-01
-09
-17
-25

LAB TEST

Stress-test taken in temperature-controlled room, with thermal body scans.
Dryarn beats in comfort its competitors with:

- the dispersion of the heat produced by the body during physical exertion
- the rapidity of drying at the end of physical exercise.

Test sotto sforzo effettuato in camera climatica attraverso termografia.
Il Dryarn risulta superiore nel comfort ad altre fibre:

- nella dispersione del calore prodotto dal corpo durante lo sforzo fisico
- nella rapidità di asciugatura al termine dell'esercizio fisico

LIGHTNESS LEGGEREZZA

The reduced specific weight of the yarn guarantees a light and dry garment. Dryarn is the **lightest fiber** on the market today.

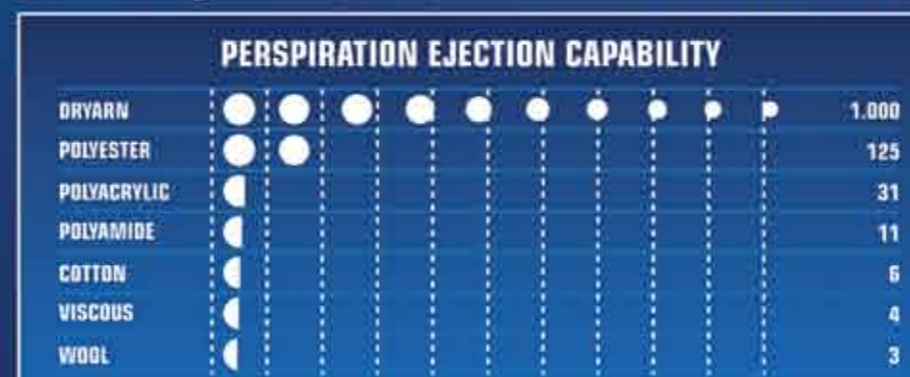

Leggerezza e comfort grazie al ridotto peso specifico del filato: il Dryarn è la **fibra più leggera** esistente sul mercato.

BREATHABILITY TRASPIRABILITÀ

DRYARN wicks away the sweat produced during physical activity, permitting evaporation on the outside of the fabric. This keeps the skin **cool and dry**.

DRYARN conduce il sudore prodotto dall'attività fisica all'esterno a tutto vantaggio del comfort fisico, garantendo alla pelle una piacevole **sensazione di freschezza e di asciutto**.

BACTERIOSTATIC BATTERIOSTATICO

Acting as an invisible barrier that **respects the skin's PH balance**, this fabric protects the skin's natural bacteria, preventing the growth and reproduction of harmful bacteria that cause bad odors, dermatitis, rashes and allergies.

Funziona come una barriera invisibile che **rispetta il PH naturale** della pelle; protegge i batteri fisiologici della flora cutanea e impedisce il proliferare di quelli nocivi, responsabili della formazione dei cattivi odori, di dermatiti, irritazioni ed allergie.

DURATION RESISTENZA

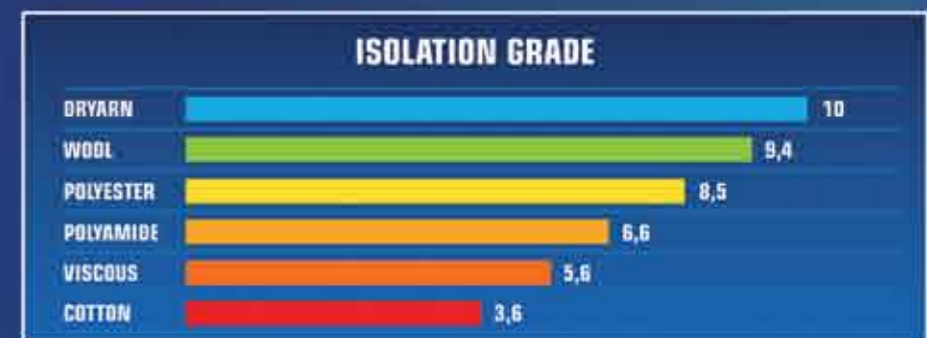

Highly resistant to abrasions, rips, long sun exposure, excessive rubbing (pilling) and sea water. This fabric will not shrink or swell and the mass-coloured yarn ensures that **colours will not fade even after frequent washings**.

Ottima resistenza alle abrasioni, alle rotture, a lunghe esposizioni alla luce, allo sfregamento e non ultimo all'immersione in acqua di mare. Non è soggetto a restringimenti e dilatazioni tipiche dei tessuti tradizionali e i **colori** sono solidi e **resistenti a lavaggi frequenti** in quanto il filato è tinto in pasta.

THERMOREGULATION TERMOREGOLAZIONE

The excellent insulation properties of DRYARN **stabilize and maintain the body temperature** even under the most extreme conditions. The superior thermo-regulating properties of DRYARN allows a reduction of other clothing weight and thickness offering **more freedom of movement**.

DRYARN, grazie alla sua elevata capacità d'isolamento, stabilizza e **mantiene costante la temperatura del corpo** in condizioni esterne di alta o bassa temperatura, anche le più estreme. L'elevato grado di termoregolazione permette di alleggerire e limitare il numero di capi di abbigliamento indossati in ogni condizione climatica, dando una **maggiore libertà di movimento**.

ECOLOGICAL ECOLOGICA

This is an eco-friendly textile fiber, dyed at origin (mass-dyed), with non-polluting chemicals used in the dyeing process. It also **100% recyclable**, so that it can be **reintroduced in the manufacturing cycle** and converted into a variety of objects. (TNT)

È una fibra ecologica in quanto colorata all'origine (in pasta) con additivi non inquinanti. **100% riciclabile**, può essere **reintrodotta nel ciclo produttivo** per realizzare una vasta serie di oggetti di uso quotidiano (TNT).

EASycARE EASycARE

Stain and wrinkle-resistant, colours do not bleed. Anti-macchia, **non si stira**, non rilascia colore.

TRIMMER FABRIC

FABRIC WITH CARBON THREAD

Our High Performance fabric with Carbon fiber is a truly **practical and technologically advanced innovation**.

The optimum percentage of **carbon** in the fabric makes it high-performance and ensures that it has a **positive impact on the body's well-being** by reducing **cardio-circulatory stress**. Athletes submitted to exercise stress tests in controlled environment and researchers also tested the Trimmer fabric. Test results show a slowing down of the heartbeat, which eases cardio-circulatory stress.

Tessuto High Performance con fibra di Carbonio che rappresenta un'assoluta **innovazione in termini di tecnicità e funzionalità**.

Il **carbonio**, presente in percentuale ottimale, conferisce al tessuto alte prestazioni che impattano positivamente sul **benessere dell'organismo**, riducendo lo **stress cardio-circolatorio**.

Testato in Camera Climatica da atleti e ricercatori è emerso che indossando un capo in tessuto Trimmer si riduce la frequenza cardiaca, alleviando lo stress cardio-circolatorio.

BENEFITS:

CONSTANT TEMPERATURE TEMPERATURA COSTANTE

Optimal thermoregulation keeps body temperature constant. L'ottima termoregolazione mantiene costante la temperatura corporea.

NORMAL BREATHING RESPIRAZIONE REGOLARE

Less oxygen is required even under great body stress. Sotto sforzo non è richiesto maggior ossigeno.

LOW HEART RATE FREQUENZA CARDIACA RIDOTTA

Improves blood circulation and cells oxygenation. Migliora la circolazione sanguinea e l'ossigenazione delle cellule.

LESS LACTIC ACID MINOR ACIDO LATTICO

Concentration of lactic acid is reduced improving muscle performance. La concentrazione di acido lattico è ridotta migliorando la performance muscolare.

Certified TO DEKO-TEX STANDARD 100, CLASS II

Stress-test taken in temperature-controlled room, with thermal body scans. New Trimmer Fabric beats in comfort its competitors by keeping the body in its optimal conditions.

Test effettuato in camera climatica attraverso termografia. Il nuovo tessuto Trimmer garantisce il massimo comfort facendo raggiungere al corpo le sue condizioni ottimali.

HIGH-TECH SHOES

MORE BALANCE + BETTER CONTROL = HIGH PERFORMANCE

GEL GEL

Gel insert acts as a shock-absorber for the heel and protects the tendon reducing the chance of inflammation

Vano interno con pastiglia in Gel per ammortizzare il peso del corpo sul tallone evitando l'infiammazione del tendine

UPPER TOMAIA

Nylon mesh/PU/PA is breathable and tear-resistant

Il Nylon mesh/PU/PA consente la traspirazione ed è anti-strappo

GREAT CONTROL

The innovative SLAM system reduces stress on the ankle, by ensuring that it is always correctly aligned and improving posture.

L'innovativo sistema Slam riduce gli sforzi sulla caviglia che risulta sempre essere perfettamente allineata al corpo, migliorandone la postura.

MORE BALANCE

Gel and compressed air interact to offer superior flexibility to the sole as well as adaptability to any surface and incline, even under extreme conditions.

Una speciale cella in Gel e aria compressa rende la suola estremamente flessibile e in grado di adattarsi a qualsiasi superficie e inclinazione: la scarpa è sempre in presa, anche in condizioni estreme.
